Forecast for Saturday 12 Dec 2020

Weather: A grey overcast day across much of the Northwest Highlands. There will also be occasional rain and drizzle with snow confined to highest peaks. Drier, clearer conditions will reach Skye and Knoydart by early evening.

Chance of cloud free mountain/hill tops above 800m: Very little chance with extensive cloud cover around 600 to 700m with patches lower down. Cloud bases over hills towards West Coast may be above some of the tops, especially later in the day.

Visibility: Pockets of good visibility towards West Coast otherwise misty conditions, the visibility only a kilometre or two and becoming very poor in persistent rain and drizzle.

Met Office Aberdeen Meteorologist's View

Note light winds on the tops but still feeling cold with damp conditions and temperatures close to freezing.

Forecast for Sunday 13 Dec 2020

Weather: A deceptively dry, bright start with a touch of frost in the glens. Soon clouding over with light rain and sleet edging in from the southwest during the morning turning persistent and heavy in the afternoon. There will be a short spell of snow above 600m, combined with southeasterly gales leading to temporary blizzard conditions on higher parts before turning to rain at all levels during the evening.

Maximum wind: Southeasterly winds with average speeds on the tops of 30 to 40mph and gusts to 60mph.

Chance of cloud free mountain/hill tops above 800m: 60% first part of morning then little chance from late morning. Thickening cloud with bases lowering well down the hills by the afternoon.

Visibility: Good at first, turning poor from the south later in the morning and virtually nil in heavy rain and snow.

Temperature: **Glens:** Minus 1 Celsius rising to 8 Celsius later in afternoon.
At 800m: Zero Celsius rising to plus 3 Celsius.
Freezing level: 800m in the morning, rising to 1300m in the evening.
